

The VM Doctor is in Foglight for Virtualization, Enterprise Edition

Did you know leading analyst firms estimate that companies could be losing up to \$9,997 per hour in high-end revenue due to down-time or degraded performance? With Foglight for Virtualization, Enterprise Edition your virtual environment gets regular check ups so you can diagnose inefficiencies and provide the remedies needed to maximize utilization and improve performance – so you save money.

Foglight for Virtualization allows IT pros to:

- **Visualize** across the IT Stack
- **Analyze** for proactive service assurance
- **Optimize** for maximum performance and lowest cost

Visualize

Save Time and Collaborate Effectively with Actionable Intelligence

Granular insight into

- Heterogeneous Virtual Environments
- Microsoft Active Directory
- Microsoft Exchange
- Storage Infrastructure

Heterogeneous hypervisor support for

VMware ESX and ESXi

Microsoft Hyper-V

VMWare vCloud Director

VMware View

Customizable

Dashboards

Alerts

Reporting

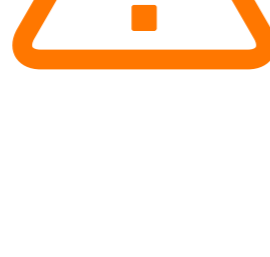

"The first thing I noticed that it was pretty intuitive and easy to use. I like how it breaks everything down into categories."

– Chris Powell, 6 years IT experience

Analyze

Improve Mean Time to Resolution and VM to Admin Ratios

Forensic Analysis of Virtual Resources

Self-learning IntelliProfile™ analytics

Ability to Drill down from dashboard to problem area

Single-click auto-remediation

User-controlled automation of

VM lifecycle management

Event remediation

In-context administration

"The VM top consumers dashboard was incredibly useful. Exploring from [there] to see the host utilization metrics was easy to do, clean and easy to read."

– Brad Nigh, 16 years IT experience

Optimize

Reduce OPEX and Better Manage CAPEX

Maximize VM Density

Optimize CPU and Memory Usage

Optimize Storage Resources

Reclaim Wasted Resources

Capacity management for insights into

Growth Scenarios

Capacity Trending

Future Capacity Forecast

"I was able to dive deeper into the Capacity Manager. This became very beneficial to look at VM's and the Datacenter as a whole and see where growth projections put our company for planning for the future."

– Brian Smith, 6 years IT experience

Cost Transparency with

Chargeback Reporting

Custom Groups

Flexible Models

Go beyond one-dimensional performance monitoring to ensure the health of your virtual environment.
